

## Protect the environment and save money

### Sounds too good to be true? Not with the innovative and environmentally friendly ECO SKIN 2.0 from Austria Email AG.

The ECO SKIN not only impresses with its modern design, but also with its environmental friendliness and optimum price/performance ratio.

Made from recycled PET bottles, the fleece used as insulation is a real game changer. The polyester fleece is also used in the manufacture of warm and skin-friendly fleece jackets and is perfectly tolerated by allergy sufferers. It keeps the heat inside the hot water tank and thus reduces energy consumption throughout the house.

Thanks to its perfect fit, which is also due to the two-stage hook strip that is difficult to damage even with resolute handling, the insulation retains its shape and prevents chimney losses. This can save up to €3,500 in energy costs over the lifetime of a 1000 litre storage tank - you are in the profit zone after just 2-4 months.

The material is generally easy to compress, making it particularly easy to install, even at low temperatures on building sites.

More information at [www.austria-email.at](http://www.austria-email.at).

#### Everything at a glance:

- Up to 47% better thermal insulation
- Increased savings (up to € 3,500) over the lifetime of a 1000 litre cylinder
- Additional floor insulation
- Significantly improved connection situation
- Perfect hold of the rosettes and cover caps
- Easier and quicker installation, even at low temperatures
- Environmentally friendly (100% recyclable; 70% recycled material)
- Perfect fit, therefore no chimney losses
- Insulated connection caps
- High-quality packaging with carrying handles
- Saves storage space (one common insulation for 3 storage tank types PSM / PSR / PSRR)
- Fire protection class B2 (according to DIN 4102-1)
