

Quick and easy installation of the smart Explorer Evo 2 domestic hot water heat pump from Austria Email.

The smart Explorer Evo 2 domestic hot water heat pump from Austria Email, the storage and heating technology specialist, not only reduces operating costs, but is also characterised by very quiet, energy-efficient operation. The heat pump is easy to install.

Top equipment

Technical details

- The heart of the system is the new controller generation, which allows many additional functions and displays them on the screen.
- Lowest possible energy consumption due to even better COP values (A20/3.8, A15/3.5, A7/3.16, according to EN16147)
- New refrigerant R513a with low GWP and more efficiency
- Maintenance-free ACI Hybrid external current anode
- Horizontal heat exchanger connections
- 1.8 kW auxiliary heating element - no calcification possible due to the use of a dry heating element.
- Generously designed heat exchanger for the integration of additional energy generators
- With photovoltaic function for PV own power use
- Low space requirement and ceiling height necessary due to rotatable air connection spigots
- Volume 200 and 270 litres

With the Explorer Evo 2, there is always a hygienically safe supply of hot water. The tradesman also benefits from easy assembly and installation and the fact that the unit can be transported lying down, as well as from its low weight of 111 kg, which makes it easy to install. This domestic hot water heat pump is very quiet in operation, achieves energy efficiency class A+ and is Smart Grid and Smart Home capable.

The Cozy Touch app for remote control of the unit.

The Cozy Bridge enables control of the networked appliances. For this purpose, the Cozytouch app is available for download free of charge in the respective store.
